

Animal and Pet Policy

Having a relationship with a pet can help children develop a caring attitude and skills such as nurturing, responsibility, empathy and improved communication. Having a pet in an early childhood environment enables children who are not otherwise exposed to animals to learn these skills. The pet will become part of the daily educational program and lead to activities and learning about other animals.

National Quality Standards (NQS)

Quality Area 2: Children’s Health and Safety

2.2.1	At all times, reasonable precautions and adequate supervision ensure children are protected from harm and hazard
-------	--

Quality Area 3: Physical Environment

3.1.1	Outdoor and indoor spaces, buildings, fixtures and fittings are suitable for their purpose, including supporting the access of every child.
-------	---

3.2.3	The service cares for the environment and supports children to become environmentally responsible.
-------	--

Education and Care Services National Regulations

168	Policies and procedures are required in relation to health and safety
-----	---

Early Years Learning Framework

Learning Outcome 2:

Children become socially responsible and show respect for the environment

PURPOSE

Our service aims to provide a safe, hygienic and humane environment for all animals and pets that visit or reside at the service, which will educate children in the proper care of animals.

SCOPE

This policy applies to children, families, staff, management and visitors of the service.

IMPLEMENTATION

Pets help children from a young age to learn to care for other living things. They can teach a sense of responsibility, caring and tolerance. They can offer many opportunities for developing observational skills and basic natural science experiences. If the educators wish to have a pet in the service, they must make all the decisions in consultation with the Nominated Supervisor and families.

Educators are encouraged to foster children’s ability to understand and respect the natural environment and the interdependence between people, plants, animals and the land.

Responsible ownership of pets, animals or birds that may reside at the Education and Care Service or visit the premises is vital. Role models of appropriate behaviours with animals and guidance in caring for the needs of animals are beneficial for children.

Service Pets

- Management, Educators, children and families should consider the rationale for having a pet and long-term implications of such a decision prior to getting the pet.
- All pets and their enclosures are to be kept clean and hygienic with appropriate bedding and water.
- Food will be made available for all pets and animals, but kept out of reach of children at all times.
- Any animal or pet kept at the service will be regularly fed, cleaned, vaccinated, and regularly checked for fleas and wormed.
- Animals including pets will not be allowed in the sand pit or any other play area. In event that this happens, educators will refer to the Sand Pit Policy.
- Animals including pets will never be taken into the food preparation area nor will they be allowed near the eating or sleeping area.
- Anyone who has handled the animal or pet will immediately wash their hands after they have finished handling the animal or pet.
- Children's animal or pets will only be allowed in the service when the Nominated Supervisor has granted permission.
- We will include in the program how to properly care for animals and how to treat them appropriately.
- Pets will not have access to children's bedding, toys, food preparation areas, eating surfaces and utensils

Animal Visit

There are situations that may spontaneously occur, involving animals. For example, there may be a situation where an animal or bird has made its way into the service. Educators may use this as a spontaneous learning experience for the children. At all times they will ensure the safety and wellbeing of the children.

A professional should monitor the animal's movements to ensure a speedy and efficient capture, but priority is to be given to educator, child and family safety. At no time is the potentially dangerous animal, insect or bird to be approached or touched by educators, children or families

Pests & Vermin

- Pest control will occur at the Education and Care Service on an annual basis as a minimum.
- Educators will monitor any occurrences in the Service to determine the success of control measures.
- If pests and vermin are seen, Educators will advise the Nominated Supervisor.
- The Approved Provider is responsible for arranging additional pest control visits.

- Where appropriate, Educators will discuss with the children safety issues relating to dangerous products, plants, vermin and objects.
- Educators will thoroughly clean all areas that animals or pests have accessed in the Education and Care Service with disinfectant.
- If the remains of an animal or animal faeces have been found, the remains will be disposed of according to the local Council guidelines and the area where the remains were found will be thoroughly disinfected.
- Educators are responsible for assessing any situation in the Education and Care Service where animals are involved to ensure the health, safety and well being of children, families and animals.
